

OIL RECLAMATION SYSTEM

Significantly reduce annual oil expenses! Protect your equipment from harmful particles/sludge! Positively impact the environment! Fluid Power Energy has developed a product to help you do all three. Our new Oil Reclamation System allows you to clean up to 150 gallons of dirty oil by removing harmful particulate matter.

Above data is based on a 48 hour test of 15w40 diesel oil. Oil cleanliness is based on third-party oil sampling - additive package or clean oil may have to be added to reclaimed oil to be deemed as suitable for reuse.
